Chandragupt Institute of Management Patna (CIMP) organized an interaction with Prof. (Dr.) Jawar Singh, Department of Electrical Engineering, IIT- Patna under the IIC activity.

Prof. (Dr.) Rana Singh, Director, CIMP opened the event with a welcome speech. Dr. Rana Singh, Director, CIMP welcomed the guest, other dignitaries and audience.

Further this day, Prof. (Dr.) Jawar Singh, addressed the audience and said that it's an honour to speak about science day, it is also about Raman effects, the noble prize winner C.V. Raman. Pseudo science talks about the experience of a person based on understanding and predicting weather forecasts rather than satellite forecasting but it is not necessary because there is a chance of error also in pseudo science. Prof. (Dr.) Jawar Singh also said that Raman effects help in communication in optical fibers, if any stone has shine then it reflects the light in different directions with some energy, which is measured by CV Raman.

Further, Prof. (Dr.) Jawar Singh said that Science brings lots of technology to upgrade our life and standard of living. Study of the Star and the black hole by Shri Subrahmanyam Chandrashekhara which helped us to understand the collapse of black hole. He also mentioned Shri Satyendra Nath Bose as his significant contribution in quantum mechanics or state beyond the imagination which can be used in the upcoming future. He also talked about Shri APJ Abdul Kalam who was known as missile man of India.

Prof. (Dr.) Jawar Singh also said that Indian scientists face limited funding in our country, the amount related to research and technology is very less to Indian scientists. Talented researchers left India and go to foreign countries for better opportunity and this is also a problem. Lack of infrastructure is also a problem in front of Indian scientists. Collaboration of Indian scientists with an educational system is not up to the mark for better outcome of research. Any product development needs collaboration of different sectors like technology, management, information, law etc. Digital payment is playing a prominent role in the transaction method, Aadhar is also a good initiative taken by the government in digital things.

Faculty members, students, staffs and others distinguished dignitaries were present during the session.
