PATNA: The Incubation Centre of Chandragupt Institute of Management Patna has signed a Memorandum of Understanding (MOU) with the esteemed Dr. Sarvapalli Radhakrishnan Rajasthan Ayurved University, Jodhpur. The signing ceremony took place in the distinguished presence of the Governor of Rajasthan Kalraj Mishra, at the prestigious university in Jodhpur.

The MOU, signed by Vice Chancellor of the university Pradeep Kumar Prajapati and CEO of the Incubation Centre Kumod Kumar signifies a commitment to creating a collaborative framework that will cultivate a thriving cul-

ture of startups and entrepreneurship within the university. Key objectives of the MoU include establishing a collaborative framework to foster a startup and entrepreneurial culture within the university, leverage the expertise of the Incubation Centre to create a conducive startup ecosystem within the university and to provide guidance and support to establish an incubation center within the university,

equipped with necessary infrastructure and resources to nurture innovative startups. The MoU also includes facilitating one-on-one or group mentorship sessions, both in physical and virtual modes, covering various topics of high importance to the startups emerging from the university. The Patna-based Incubation Centre will actively share a pool of internal and external mentors, including

domain experts from the industry, to enhance the mentorship experience. This collaboration aims to provide startups at the university in Jodhpur with diverse perspectives, insights, and guidance for their holistic development.

The two institutions will also formulate joint strategies to enhance the startup ecosystem within the university.

This collaboration is not only a landmark moment for the two institutions but also an exciting prospect for health tech companies based in Bihar. The partnership aims to provide these companies with avenues to explore and contribute to AYUSH health systems, further enhancing the synergy between traditional medicine and modern technology.
